

NEW TERRACOTTA

Handmade tiles. Made individual.

A curated introduction to colour, form,
pattern and texture.

SOLE DISTRIBUTOR IN MALTA

New Terracotta is represented in Malta by CS Group Limited.
Product guidance, sourcing, specification & quotations.

Not a one-size-fits-all tile.

New Terracotta is best approached as a creative material library. Start with what catches your eye - a colour, a shape, a pattern or a texture - and build from there.

VINTAGE GEOMETRIC

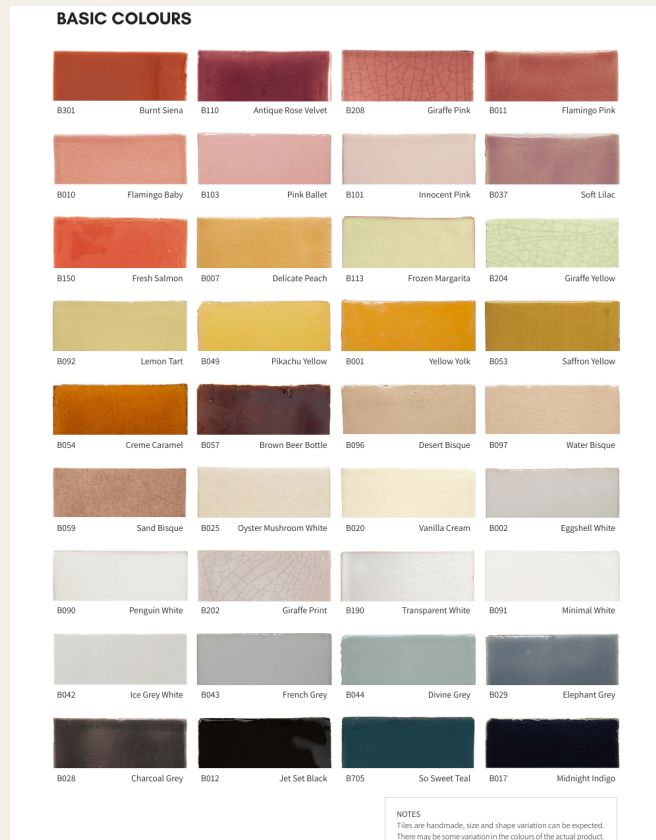

See something you love?

Let's find yours.

Start with colour.

The palette goes far beyond blues and greens. Explore warm terracottas, blushes, yellows, neutrals and deep tones alongside fresh aquas, cobalt blues and layered greens.

Warm, earthy & soft

Reds, pinks, peaches, yellows, bisques & neutrals.

Cool, fresh & deep

Cobalts, aquas, teals, greens & indigos.

And a broad matt palette for a softer, quieter finish.

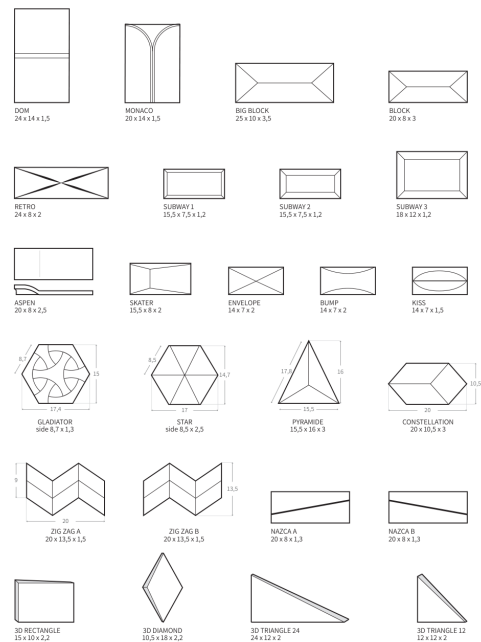

Then choose the form.

Classic field tiles, parquet formats and dimensional pieces allow the same colour to take on a completely different character.

New Terracotta quick guide on a few of the most popular tile patterns.

The visual guide and example imagery will not only show how to lay, but also the possible looks achievable through a certain style. Tile size and colour, as well as the grout colour, are the next decision in creating the overall outcome, and often certain tiles will inform their own tile pattern, but some will have endless possibilities.

3D & RELIEF TILE

3D & Relief Tile Spec. - Page 1

Field & parquet

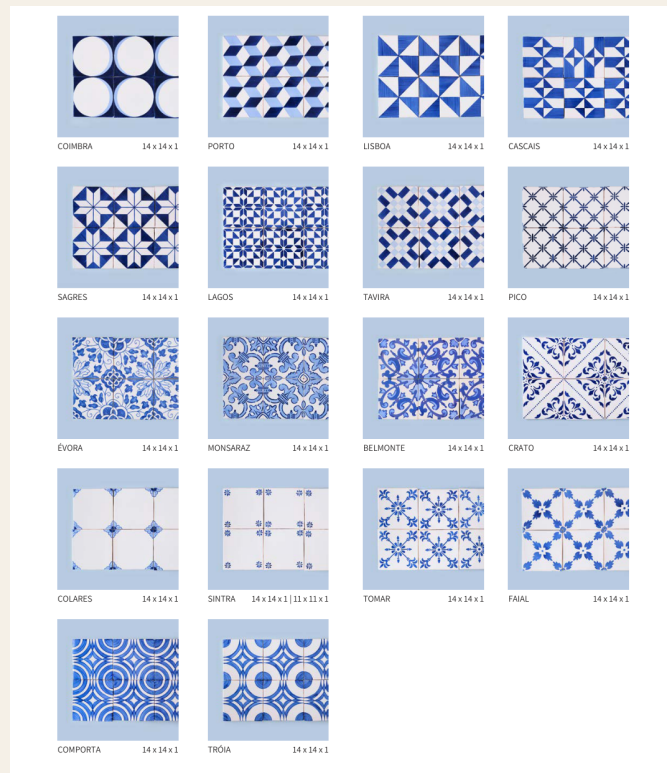

Quiet geometry, rhythm and proportion.

3D & relief

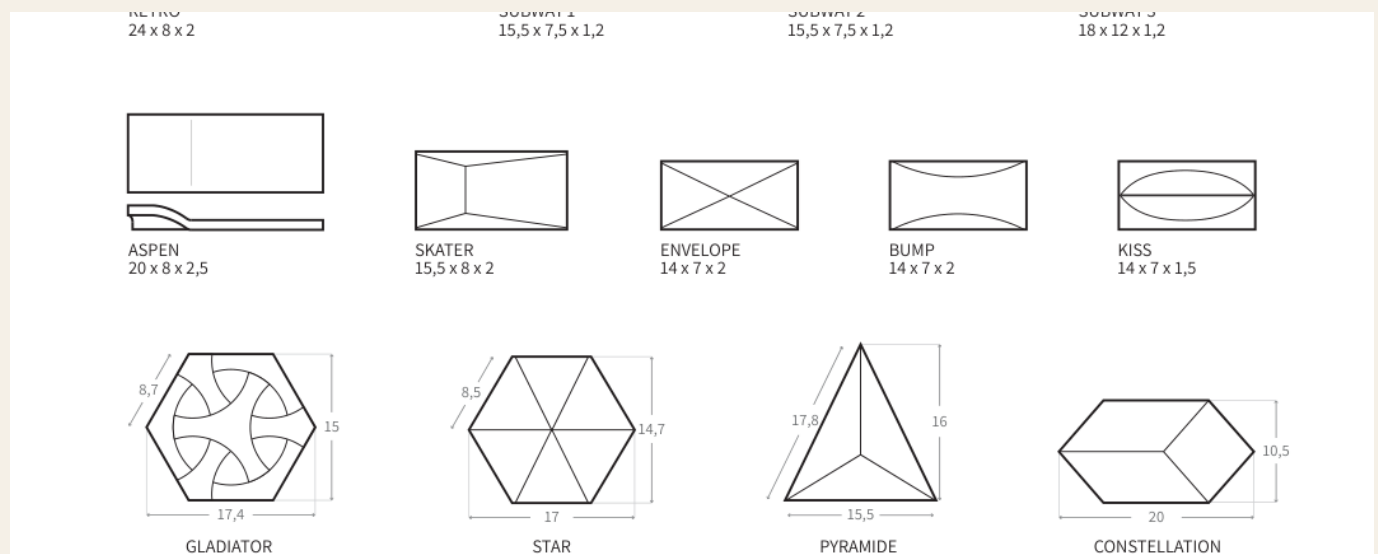

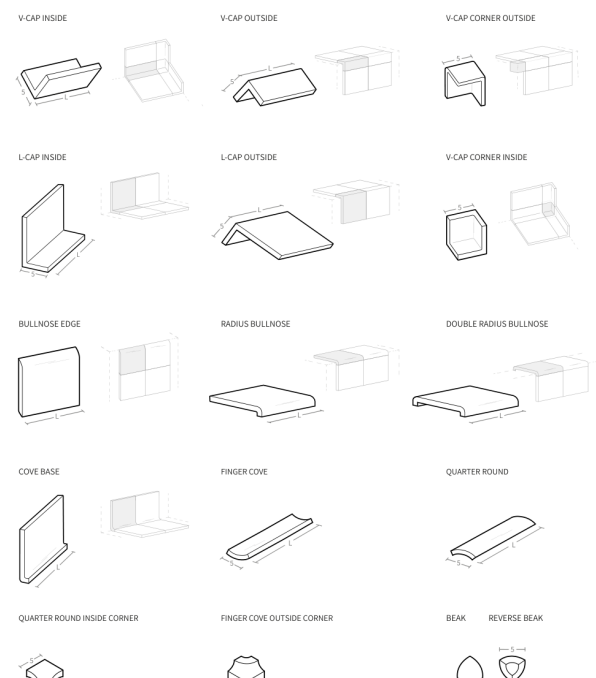

Depth, shadow and tactile surfaces.

See the material in context.

New Terracotta's project work shows how dramatically colour, format and surface can change the atmosphere of a space - from bold hospitality interiors to quieter residential applications.

Trim tiles are finishing pieces that provide a clean execution to tiled floor, walls, windows, ceilings and countertops. Its main purpose is to hide imperfections, protect edges and cover transitions between surfaces. The New Terracotta tile trims and architectural mouldings series is a compendium of ongoing functional and aesthetic solutions tailored to the projects we have been commissioned.

Make it expressive.

Hand-painted and bold pattern tiles can become a focal point, a border, a feature wall or a small detail that changes the whole composition.

TRÓIA 14 x 14 x 1

Look beyond the flat tile.

Special pieces and sculptural collections open up corners, edges, transitions and feature details - the parts of a project where thoughtful specification matters most.

Special pieces

Found your starting point?

You don't need to navigate the full technical library alone.

Let's find yours.

Share the tile, colour, texture or reference that caught your eye. CS Group can help you navigate the New Terracotta collection, identify the relevant options and move from inspiration to specification and quotation.

SEND US YOUR PROJECT REQUEST

For designers & architects

Full technical specifications are available through CS Group when you need to go deeper into formats, glazes, patterns and special pieces.
